6	Identify the operator used to check both items are TRUE
7	Identify the operator used to check if one of two items are TRUE
8	What part of computational thinking uses the operators OR / AND?
9	Can you use more than one selection operator in a program?
10	What happens if both AND operators are FALSE?
Core Vocabulary	
1	Code Blocks
2	Decomposition
3	Pattern Recognition
4	Abstraction
5	Logic
6	Sequence
7	Iteration
8	Conditionals
9	Input
10	Output
11	Debugging
12	IF, ELSE
13	Variable
14	Slideshow
15	Professional
16	Simple
17	Specific
